There was more that he asked us to do. Q. Such as? A. He wanted to set up a foundation, a non-profit foundation for public policy relating to China based in Washington, D.C. He discussed certain properties he wanted to buy in Washington, D.C. to house that foundation, a prestige property in Georgetown and a property	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MR. The general things that he wanted were he wanted to investigate up to 4,000 individuals in China or Chinese nationals living outside China, and he wanted to start with ten. He described the types of research he wanted done. Q. Would that include financial forensic research? A. Yes. Q. And would it include tracking research? A. Yes. Q. How about social media research? A. Just in connection with providing this investigatory research. For example, price? A. Yeah, of course. MR. SCHMIDT: Do you mean terms that they wanted? MR. GRENDI: Exactly. MR. SCHMIDT: Terms of the contract, did you make any requests at that meeting? A. Sure. A. Yes. There was a \$750,000-a-month flat-rate payment that was due at the end of the pay period. Q. And that was discussed at this meeting? A. At one of those meetings. I don't recall specifically which. Q. I just want to go back to this meeting in early December at Mr. Guo's apartment. Were there any other terms and conditions that Strategic Vision wanted in connection with this research agreement? A. Financial terms? Q. Any terms. A. Yes, we wanted to be paid obviously on time, within five days of the end of the pay period. We would not issue a formal invoice to avoid having any paperwork or paper trail directly with him. He would arrange for the payments at the end of the month to be made

Page 70 Page 72 found a lot of -- we were able to get information this one, or the team went and did on its own. 2 Because it would take at least five 2 on one of the individuals in Kwok's list -- there 3 were, if I recall correctly, about 92 names -- he 3 days or a week traveling, stopping what they're 4 wanted the top 15 to research. 4 doing, traveling to a common point in Europe, 5 But he did say some of the people 5 coming back here, delivering, and then consulting 6 further down in this chain might be of 6 with Guo and his agents, and then going back to 7 importance. That takes at 8 So we found, yeah, there's one guy, Frank Suen, 8 least a week just to deliver a message, round 9 S-u-e-n, who was a particular -- became a 9 trip. 10 particular object of interest. So I delivered 10 So that would be immediate-term 11 that news to Kwok, and said, "This is the kind of 11 reporting, say, weekly or monthly-type, quote, 12 information they got on him. How do you want to 12 reporting. The comprehensive one is now we got a 13 dig on him? What else would you like to find?" 13 big picture of it. This is what we found. 14 That was all verbal. What 22 that -- let's call it -- report synthesis, or 23 would you do for one of those reports? What that work? 24 24 would you do? A. Generally me. But what French Wallop 25 25 would do was she had her own contacts elsewhere Α. First of all, the contract didn't last Page 71 Page 73 three months for that to be produced. The way in throughout the U.S. government and other 1 working with any client is that things will adapt 2 governments. That was his metaphor for explaining what he wanted at a certain level. We went ahead with that as long as you keep it up at that metaphorical waterline. The actual details of the report are going to vary. That's explicit in here in this contract. We refer to the paragraph right above flat price structure. We refer to each of these as "We will measure each of the 30 reports as, quote, 'report equivalents' in the event that it is necessary to stop work prematurely on one fish and replace it with a second fish. We will then have the partial report on the terminated fish," etc. So it's explicitly understood in this contract that you're gonna be stop and go and things are going to be incomplete, and then you go on to the next one, but we'll still have that same universe of individuals to be collecting data on.
